

MOHAMED IBRAHIM OMRAN

Information Technology Auditor | Audit Data Analytics |

 [LinkedIn](#) | +20 115 533 2363 | mohamedibrahim7297@gmail.com

PROFESSIONAL SUMMARY

IT Auditor at BDO Egypt with 3+ years across IT audit and data analytics, including 2.5+ years delivering IT General Controls (ITGC), IT Application Controls (ITAC), and risk and control matrix (RCM) engagements for banking and enterprise clients against SOX, COBIT, ISO 27001, and NIST. Applies audit data analytics to full transaction populations—extracting and testing journal data in CaseWare IDEA to support journal entry testing, completeness and accuracy validation, and exception identification. Extends technology audit work into business process controls, segregation of duties, and delegation of authority reviews, translating findings into risk-rated, root-cause-based recommendations for stakeholders. Masters in business analytics and information systems; **CISA candidate**.

CORE COMPETENCIES

IT General Controls (ITGC) • IT Application Controls (ITAC) • Risk & Control Matrices (RCM) • SOX • Access & Change Management Controls • Journal Entry Testing • Full-Population Audit Analytics • Data Extraction & Reconciliation • Exception & Anomaly Analysis • Business Process & Segregation of Duties Review • Data Privacy & Governance • Audit Reporting & Management Letters

PROFESSIONAL EXPERIENCE

Information Technology Auditor | BDO Egypt, Jan 2024 – Present

Cairo, Egypt

IT General Controls & Technology Risk

- Assessed IT General Controls across clients IT environments, covering logical access, change management, IT operations, and network security (firewall configurations, VPN, access rights), and reported control gaps with risk-rated remediation actions.
- Tested change management controls over documentation, approval, testing, and rollback; identified recurring deficiencies and recommended remediation addressing their root causes rather than individual instances.
- Reviewed system configurations for misconfigurations, missing patches, and security weaknesses, and evaluated incident response readiness across multiple client environments.
- Benchmarked client IT governance and security practices against ISO 27001 and NIST and delivered prioritized improvement roadmaps.

Risk & Control Matrices and Application Controls

- Developed and maintained risk & control matrices for clients aligned with SOX, COBIT, and ISO 27001, mapping business processes and IT risks to key controls and test procedures.
- Tested application controls—input validation, access restrictions, approval of workflows, and data integrity checks across banking and enterprise applications.
- Reviewed exception reports and transaction logs to detect suspicious or unauthorized financial activity and assessed the design of client fraud detection controls.

Audit Data Analytics & Journal Entry Testing

- Used the IDEA analytics tool to assess the accuracy, completeness, and consistency of financial and operational system data, ensuring reliable audit evidence.
- Reviewed data privacy policies and assessed compliance with GDPR and Egypt's data protection regulations; recommended improvements to data governance, encryption, and retention policies.
- Drafted detailed management letters and audit reports presenting findings and strategic recommendations to senior client stakeholders.
- Conducted follow-up sessions with clients to verify remediation implementation and track control improvement progress.
- Managed multiple concurrent client engagements, applying project management practices to meet audit milestones and deliver within a scope and timeline.

Data Privacy, Reporting & Engagement Delivery

- Assessed client data privacy policies against Egypt's Personal Data Protection Law (Law 151/2020), benchmarked to GDPR principles, and recommended improvements to data governance, encryption, and retention.
- Drafted management letters and audit reports in the Background/Observation/Recommendation format for senior client stakeholders and led follow-up sessions to validate remediation.
- Managed multiple concurrent client engagements to agreed milestones and scope.

Freelance Data Analyst | Self-Employed Mar 2023 – Dec 2023

Remote

- Built Python data-cleansing routines to improve the accuracy, consistency, and reliability of client datasets used for reporting.
- Analyzed large datasets to identify patterns and trends supporting client decision-making.
- Designed Tableau and Power BI dashboards translating complex findings for non-technical stakeholders.

TECHNICAL SKILLS

IT Audit & Technology Risk: ITGC (logical access, change management, IT operations), ITAC, network security controls review, incident response readiness, IT governance

Audit Data Analytics: Journal entry testing, full-population testing, completeness & accuracy validation, Benford's Law, reconciliation, data quality testing

Tools: CaseWare IDEA, Excel (advanced), SQL, Python, Power BI, Tableau, IBM SPSS Modeler, IBM Cognos, GRC tools

Systems & Data: SAP, Oracle, MS Dynamics, and Core Banking System, etc.

Frameworks & Regulation: SOX / ICFR, COBIT, ISO 27001, NIST, GDPR, Egypt Personal Data Protection Law

CERTIFICATIONS

- CISA (Certified Information Systems Auditor), ISACA—Candidate, exam preparation in progress
- Information Systems Auditing, Controls, and Assurance—The Hong Kong University of Science and Technology (Coursera)
- Google Data Analytics Professional Certificate — Coursera
- Power BI in Finance and Accounting Analytics — Universiti Sains Malaysia
- Business Intelligence Analyst Mastery Award—IBM Cognos (2022); Predictive Analytics Modeler—IBM SPSS Modeler (2020)

EDUCATION

Master of Business Analytics and Information Systems, 2022–2023

Universiti Sains Malaysia—Sponsored by Egypt's Ministry of Communications & Information Technology

Bachelor of Business & Information Systems, 2017–2021

MISR University for Science & Technology—Grade: Excellent with Honours

LANGUAGES

Arabic: Native | English: Professional working proficiency (B2+)
